What is Safe Access?

Safe Access is an industry leading software platform that makes it easy to:

- **Define and gather health policy** agreements from your employees so everyone's on the same page.
- **Increase trust** by allowing our team to review and grant access so your company can keep individual data private.
- **Easily meet compliance requirements** with a secure, state of the art system designed to protect health data.

Why should I choose Safe Access?

- **We are a trusted resource** in the events community and our robust system has done everything from executive retreats to 10,000+ attendee conferences. We also cover screening for international attendees.
- **We take privacy seriously.** Attendee data is never resold, we don't use facial recognition, and all data is deleted three weeks after an event to minimize any data risks. We're also HIPAA, GDPR, CCPA compliant.
- **We take the risk off your team.** Our experienced team will advise you on industry best practices, prevent your company from being liable for handling sensitive health data, and keep you up to date with the changing safety landscape.
